

FIELD INSTALL ENGINEER

Due to our continuing growth strategies, we now require another Field Service/Install Engineer to service/install our Company range of Garage equipment to independent workshops, franchise garages, body shops and commercial vehicle service and repair facilities.

Based from home you will be attending customer sites to install, service, repair, calibrate and commission garage equipment for both mechanical and electronic based products including emission analysers, brake testers, vehicle lifts, tyre changers and wheel balancers.

Suitable Mechanical experience with knowledge of hydraulic systems would be preferable. Full training on products will be provided.

To be successful in this role, you must be able to work well on your own, have good time management, excellent fault finding skills, be action orientated and able to remain composed under pressure. Customer Care is a key element of this role and the successful candidate must have great interpersonal skills and the ability to communicate at different levels.

If you believe you have the skills, knowledge and desire to succeed in this role please send your CV to dave.gisborne@snapon.com
